Working in partnership  
to **Build**  
resilient communities

Wasda aims to support the improvement of the livelihoods of pastoral communities in the Horn of Africa

## PARTNERSHIP IN ACTION

Since 2006 WASDA in partnership with Oxfam GB has been implementing projects in south Somalia. The implemented projects include Water, sanitation and hygiene (WASH), Livelihoods, IDPs support and Conflict Mitigation responses among others. Our programs in Somalia continued to expand in 2010/2011 financial year. We managed to sustain our programs through difficult and insecure areas by reaching the most vulnerable beneficiaries among the Lower and Middle Juba populations.

## SOMALIA PROGRAMME IN 2011-2012:

### 1. ECHO SOWASHILE PHASE II

- It covers 15 centres in Afmadow and Jilib west district along riverine communities. The project objective is to reduce vulnerabilities of Lower and Middle Juba IDPs and the host communities to public health and food security risks of drought and conflicts.

### 2. ALTERNATIVE WAYS OF WORKING

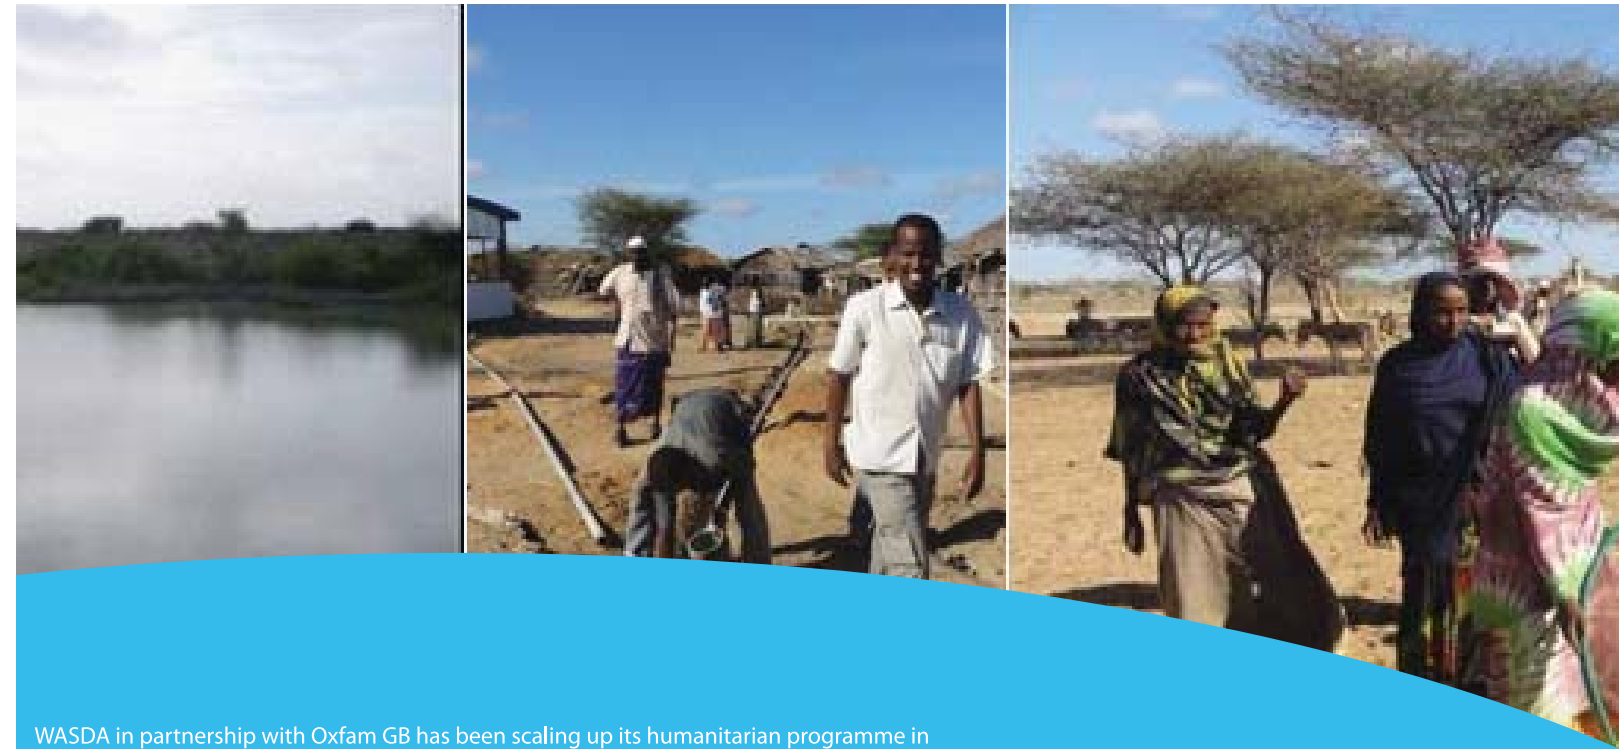

- Main sectors are livelihoods and water improvement. It is a three year project that seeks to support 30 locations in lower juba region, out of which 22 villages will be directly supported of project of their own and the remaining eight will be control villages in order to establish the varying difference in progress made in the two villages' categories as a result of the interventions.

### 3. PEACE BUILDING AND CONFLICT MANAGEMENT

- The project is engaged in Peace dividends projects along the Kenya -Somalia border. It's implemented by a consortium of three organizations: WASDA, WPDA and DEVCON and its funded by Pact Kenya. The areas of operations are Diff Somalia, Diff Kenya as one peace corridor and Gherlie Somalia and Gherlie Kenya, Wajir Bor, and Riba Kenya as another peace corridor.

## EMERGENCY DROUGHT RESPONSE

In Somalia, severe drought has been affecting the entire country. The drought has caused a severe food crisis across the nation that threatens the livelihood of millions of people. Overall, food security outcomes remain the worst in the world, and the worst in Somalia since the 1991/92 Famine.

WASDA in partnership with Oxfam GB has been scaling up its humanitarian programme in South Somalia to respond to the emergency crisis that was declared which led to the food and water security crisis –

WASDA in partnership with Oxfam GB is involved in the following emergency projects:

#### 1. EXTENSIONS OF THE ECHO WASH AND LIVELIHOODS:

covering mostly the riverine area in west Jilib. The aim is to improve water infrastructures and sanitation facilities in the region.

Waterpan Inlet

#### 2. EC LIVELIHOODS PROJECT TARGETING LONG TERM PROJECTS:

targeting pastoralist areas in 7 villages in afmdow-one activity per village.

New shallow wells

#### 3. UNICEF FUNDED IDPS TRANSIT POINT SUPPORT PROJECT IN DOBLEY TOWN:

includes water trucking, boreholes support, construction of latrines for IDPs transit centres, Hygiene promotion activities and non food items distribution.

Doboly borehole Masonary tank after the rehabilitation

#### 4. EMERGENCY CASH TRANSFER IN MIDDLE AND LOWER JUBA REGIONS:

Targets 14600 households in both regions. It also includes support to 3000 farmers with farm inputs such as seeds, and technical support. Has some WASH activities like rehabilitation of shallow wells, public health promotion and boreholes support.

Diesel support

Jilib farming support  
– ECHO funded 2010 -2011

Seeds distribution (Beans,Sorghum,maize)

#### 5. CHF PROJECT:

mainly drilling of 3 boreholes and infrastructure development for the boreholes. It also rehabilitates 10 shallow wells for the riverine areas to improve access to safe water.

#### 6. SIDA FUNDED EMERGENCY DROUGHT RESPONSE PROJECT:

that support three key sectors - food security improvement, water, sanitation and health. It involves provision of fodder seeds to farmers, diesel support, boreholes support, and rehabilitation of Doblely general hospital among other activities.
